Los Angeles Regional Water Quality Control Board

January 9, 2013

Joseph Kwan Monadnock 18301 E. Arenth Ave. City of Industry, CA 91748

SUBJECT:

REQUEST FOR GEOTRACKER ELECTRONIC SUBMITTALS

SITE:

Monadnock, 18301 E. Arenth Ave., City of Industry, CA 91748

(WIP NO.: 105.0181, SITE ID: 2040273, GEOTRACKER GLOBAL ID:

SL0603701526)

Dear Joseph Kwan:

The California Regional Water Quality Control Board, Los Angeles Region (Regional Board) is the public agency with primary responsibility for the protection of ground and surface water quality for all beneficial uses within major portions of Los Angeles County and Ventura County, including the above-referenced site. Under the oversight of this Regional Board, you have been conducting environmental assessment and/or remediation activities.

GEOTRACKER REQUIREMENTS

In January 2005, the State Water Resources Control Board adopted regulations requiring the electronic submittal of information (ESI) over the Internet for cleanup programs overseen by this and other Regional Boards, starting January 1, 2005. These submittals are made to the GeoTracker system, which is a geographic information system providing online access to environmental and regulatory data.

Parties, such as you, who are responsible for assessment and/or cleanup of pollution at sites overseen by the Regional Water Board's Underground Storage Tanks (USTs); Spills, Leaks, Investigations, and Cleanups (SLIC), also known as the Site Cleanup Program (SCP); Land Disposal; and Department of Defense (DOD) programs are required to submit the following information associated with site activities since January 1, 2005, as defined by GeoTracker ESI requirements, electronically via the Internet:

- 1. All electronic Laboratory Data (EDF) files.
- 2. All electronic Boring Log and Well Screen Interval files.
- 3. All electronic Depth to Water Data (GEO WELL) files.
- 4. All electronic Locational Data (GEO XY) files.
- 5. All electronic Elevation Data (GEO Z) files.
- 6. A current electronic Site Map file (PDF preferred) associated with site activities.

MARIA MEHRANIAN, CHAIR | SAM UNGER, EXECUTIVE OFFICER

7. Paperless Report (PDF) copies of all technical reports, work plans, etc. associated with site activities since January 1, 2005.

Additional information about these electronic reporting items is provided at the following Internet link: http://www.waterboards.ca.gov/ust/electronic submittal/report rqmts.shtml

The text of the regulations can be found at the following Internet link:

http://www.waterboards.ca.gov/ust/electronic submittal/esi regs.shtml

The information within GeoTracker is available to the public at the following Internet link: http://geotracker.waterboards.ca.gov

Paper Reporting Requirements

Beginning July 1, 2005, a paper copy of reports is no longer required upon submittal of the electronic copy, unless the Regional Board specifically requires the paper copy to be submitted. The electronic reports are intended to replace the need for a paper report, and will be used for all public information requests, regulatory review, and compliance/enforcement activities.

Getting Started with GeoTracker

You will need a GeoTracker account and password for submitting data and reports. To obtain instructions for receiving a GeoTracker password please visit our ESI website (see the Getting Started section):

http://www.waterboards.ca.gov/ust/electronic_submittal/index.shtml

We have provided the GeoTracker Global ID for your site in the header block of this letter, which will be required on the account application form. Additional information about GeoTracker, including a Frequently Asked Questions (FAQ) document and technical support contact information, is also available at the previous ESI website link.

You should submit the requested information by February 11, 2013.

Should you have any questions related to this project, please contact me at (213) 576-6803 or ghu@waterboards.ca.gov.

Sincerely,

G. Jeffrey Hu, P.E.

Senior Water Resources Control Engineer

Chief, Site Cleanup Unit II
